

## Conscience with the Sustainable Development

Sustainable development is one of the strategic pillars of our business management, whose north is oriented and we embark on the generation of economic and social development, protecting the environment.

In this direction, our company has been working various programs of social and environmental responsibility, led by the area of Sustainable Development.

In the case of our social responsibility management we are focusing on three key areas such as education, health and nutrition, to the benefit of our employees, their families and community members.

And regarding our environmental management we have been working oriented ecosystem recycling and care programs.
